

LED indicator prototype (DIN RAIL mount) LEDi-01

- Product Description

Description:

Voltage indication lamp with 10mm LED. Ready evaluated prototype. Indicates 230V / 50Hz AC

Characteristics:

- Reliable - long life
- Efficient
- Solid State
- Custom colors and luminosity
- Customizable for other voltage indications
- Low Cost

Applications:

- Electrical installations where a reliable indication is required

Ratings*:

Description	Value	Unit
Nominal indication Voltage*	200-250	V AC
Average consumption (with a typical red led)	40	mW
Ambient temperature range	-40 to +80	°C
Absolute Maximum Transient Voltage	600	V _{peak}

Connections*:

Description	Terminal
230V Neutral/Line	A
230V Line/Neutral	B

* As this product is a prototype, specifications are not mandatory and can/may change in the final product
